All statements marked below apply to the power output values shown above. (Select the one that applies)

- The device for which this certificate pertains is equipped with a timer control system. The intensity of the lamps (power output) has no internal operational effect on the function of the device. The information provided herein is a "Output" certificate and does not infer that the machine has been calibrated. The value shown as "Calibration/Output Data" represents the intensity of the device determined at the time of evaluation.
- The device for which this certificate pertains is equipped w "Calibration/Output Data" value shown above is the calibra evaluation.
